Minimalist and stylish - the new 600 ART stove

Minimalism meets maximum fire enjoyment: With 600 ART, Swiss manufacturer Attika presents a stove that combines uncompromisingly modern design with maximum functionality. Clean lines, highly efficient combustion and outstanding quality make it a stylish new focal point in any living room.

600 ART consists almost entirely of a single large firebox. It is available as a front, 2-sided or 3-sided model. It can be placed on an individual base or on the matching base unit. A stylish side bench provides even more design freedom and makes the 600 ART an unmissable eye-catcher.

Like many stoves from Attika, 600 ART can also be customized to suit individual requirements. There is a choice of five modern colours: black, platinum, mocha, nickel and sand. The flue pipe, base unit and side bench can also be selected in the matching colour. There is also a choice between a classic steel door and a modern all-glass firebox door, as well as seven elegant handles.

The timeless design is complemented by high-quality materials and a proven fire experience. The 600 ART is based on the MAX 600 stove, which is prized for its calm and pleasant view of the flames. This is thanks to the intelligent window rinsing and the ADVANCED GLASS CONCEPT[®]. The concept includes double glazing and infrared-coated ceramic glass, which ensures an increased combustion temperature in the firebox. In combination with the latest combustion chamber technology, this means highly efficient combustion and always clear, soot-free glass panes.

600 ART can be installed room air independent thanks to the AIR-system. This increases the overall efficiency of the stove and does not interfere with controlled ventilation systems, for example in Minergie or low-energy houses.

Whether as a minimalist design object or as the cosy focal point of a room - thanks to the many individual design options, 600 ART harmonizes with any living situation and any furnishing style. Like all stoves from Attika, 600 ART perfectly combines material, form and functions.
