CONNECTING THE REMOTE CONTROL TO YOUR BIOETHANOL FIREPLACE

Follow the steps below to connect the remote control to your bioethanol fireplace.

Preparing the fireplace

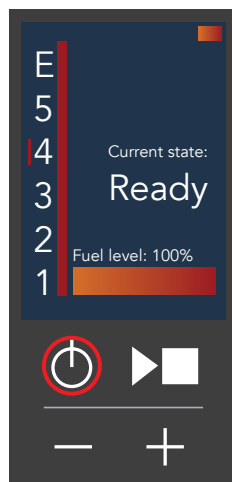

1. Press and hold **the power button**  on the control panel behind the door for approx. **10 seconds**, until you hear **3 beeps**.
2. The system will restart automatically, and the display will turn off and on again.
3. The tank indicator will briefly show 100 % before displaying the actual level.
4. Pejsen er nu klar til tilslutning af fjernbetjeningen.

Connecting the remote control

5. Press **OK** and **2** simultaneously on the remote control and hold them down for approx. **5 seconds**, until the **red LED** starts flashing.
This step must be performed immediately after step 4.
6. When the **red LED** stops flashing, the remote control is connected.

TROUBLESHOOTING

- If the **red LED** continues to flash, the connection has not been completed correctly.
- Remove the battery from the remote control, insert it again, and repeat steps 1–6.

Scan the QR code to watch a video showing how to connect the remote control to your bioethanol fireplace.
