#### CONNECTION OF THE MYFIRE WI-FI BOX

If you want to use more than the included remote control, our gas fireplaces can also be operated remotely via an app on a smartphone or tablet. To do this, you need to connect a MyFire Wi-Fi box.

To connect the MyFire Wi-Fi box to the receiver, which is located behind the inspection grid, you must plug the small connector of the Wi-Fi cable into the input marked "SI."

NOTE! The Wi-Fi box only works on the local network. This means the fireplace cannot be controlled remotely when you are outside the home network.

Tap anywhere on the screen to start the app

- 1. Select language
- 2. Select temperature
- 3. Choose 12 or 24 hour
- 4. Press "Next" to continue

#### SETUP

Press the plus icon

#### SETUP

Connect the MYFIRE WiFi box to the WiFi router.

Enter the code for your WiFi router.

Press "Connect."

#### SETUP

Connection process.

The connection process may take some time.

Once the connection is established, the MYFIRE WiFi box will leave Access Point Mode and will then be connected to your WiFi.

#### GAS FIREPLACE SETUP

The app allows you to set up your fireplace according to the icon or give the fireplace a unique name. Remember to click the checkbox to accept the name.

If your fireplace is equipped with lighting, double burner, etc., these can be selected in the setup.
